WORK EXPERIENCE

Senior Specialist

09.2020 - present

Attain

McLean, VA

- Lead team to develop a case management application and guide developers to practice Test Driven Development (TDD), Agile Scrum framework, and best practices
- Develop solutions from full story lifecycle from gathering requirements, writing acceptance criteria, performing data analysis, creating mockups, developing in Appian & SQL, and deploying code
- Outlined and designed landing page for a new application with more than 1000 users
- Owned and built internal tool for developers, improving code quality and reducing bugs
- Took initiative to create an onboarding guide to improve the process for new team members; personally arranged meeting to introduce members to both the business and technical aspects

Senior Consultant

04.2019 - 09.2020

Macedon Technologies

Reston, VA

- Led cross-functional team of 5-15 developers and revamped project management processes, developed new design documentation, and performed typical duties from writing stories, development, to deployment
- Streamlined deployments to the production environment on a two-week Sprint schedule, reducing typically hours-long deployment to under ten minutes
- Revamped an opportunity pipeline application, increasing a business process efficiency by 95%
- Worked as a servant leader to protect team from outside distractions and remove impediments, providing technical leadership and guidance; consistently met Sprint commitment, often bringing in stretch goals
- Held UAT sessions and additional meetings with clients to redefine desired scope and develop a basis of estimates for planned work which includes identification of objectives, time frames, risks, and estimates

Consultant

07.2017 - 04.2019

- Completed 95% of Sprint Capacity in a team of four developers
- Organized scrum ceremonies including daily scrum, refinement with Product Owner, retrospectives, planning
- Designed data models to support BPM Applications and created technical documentation
- Wrote and reviewed ETL scripts for data migration from Oracle to MySQL, resolved production issues
- Tracked and reported risks to the client on a weekly basis; created documentation for federal client

Web Developer (Contractor)

05.2016 – 05.2017

J P Systems, Inc.

Remote

- Worked directly with client to gather, refine, prioritize requirements, create mockups in Adobe Photoshop, and develop features in HTML5, CSS3, JavaScript, jQuery library

EDUCATION

University of Rochester | B.A. Digital Media Studies-HCI | 3.8/4.0 *cum laude*

05.2017

- Publicist, Refugee Student Alliance | Volunteer, Partners in Reading
